

# RHODE ISLAND SURE 'n' TURF

GOLF COURSE SUPERINTENDENTS ASSOCIATION

## 2020 DSA Recipient William J Coulter CGCS By Michelle Maltais

Every year we call upon our members to nominate an individual whom they believe is deserving of recognition for their efforts within our organization. The candidate should be someone whom not only contributes to the RIGCSA, but also to the game of golf and the profession. The distinguished service award is a prestigious honor and is presented to an individual who embodies the qualities that define excellence. This month via our December ZOOM meeting, I had the pleasure of announcing William J Coulter CGCS as the 2020 RIGCSA DSA recipient.

Bill has been nominated by several members for many years now and while I'm sure that most of the nominees this year were deserving, the most suitable candidate was Bill. He has an aptitude, genuine desire, and passion for service not only within the RIGCSA but also the golf industry and community as well. Similar to many of the past recipients, Bill has served on the RIGCSA board in every capacity, participated in countless fundraising events, and has served on an infinite number of committees. What sets him apart is his desire to always do more. While most past presidents are content with taking a backseat, and flying under the radar, the opposite can be said of Bill. When the S&R committee approached Bill and asked him for help with some of their responsibility he didn't hesitate. He has also been an advocate for higher education supporting both local universities and students alike. It would be a grim future for organizations like ours without individuals like Bill willing to step up to the plate. There are many individuals

within this organization myself included, that have looked up to Bill as a mentor. Bill has been a solid role model and has groomed and guided past assistants Henry Olstynski, Matt Emmond, and Frank Vollaro to go on and become superintendents themselves. Bill exemplifies a selfless individual who is willing to sacrifice and do whatever it takes to ensure that the success of our organization is realized by the next generation.

After my introduction, Matthew Crowther CGCS continued the presentation and said a few words about his dear friend. Matt gave us an early look into Bill's past and enlightened us with the history of how Bill's great grandfather and great uncle were superintendents in the industry at Point Judith CC before the term superintendent was even coined. Bill who grew up in Exeter, attended North Kingston High School and started playing golf at the age of 15. Originally helping out in the pro shop at Exeter CC in the early 1980's, Bill transitioned to the grounds crew and then joined the grounds at North Kingston GC five years later. Although he loved the profession he never realized that he could make a career out of it until he was talking to some fellow students at URI who were in the turf program. He eventually switched his major from animal science to turf and graduated URI with a BS in Turf Management in 1988. After graduation, under the keen supervision of Don Silven, he worked for the next eight years as the assistant superintendent at Warwick CC in Warwick RI. It was there that he met turf student Matthew Crowther. The two became fast friends and forged a solid friendship that has lasted decades.

Earlier in the week the DSA award had been mailed to Bill and he was able to proudly display it as he delivered his acceptance speech in which he thanked those that paved the way before him. "I had great predecessors who stepped up to the plate and took me under their wing when I was new in the industry, I just want to pay it forward and pass on what I've experienced with some of the younger guys entering the turf profession." said Bill. He went on that say that he felt confident the next generation will continue in his footsteps to ensure a bright future for the RIGCSA. Congratulations Bill, we thank you for your service!!

## President's Message

It may be an assumption, but I am guessing as a group, we all are ready to turn the page on this past year and never experience the like again.

One of the most difficult things is that we have lost members and loved ones and were not able to pay our respects to their families and friends. Hopefully this Spring there can be gatherings to remember the lives of our friends.

We are also seeing a change in the landscape of members and committees, not due to a pandemic, but from retirement. To those retiring, congratulations, good luck and don't be a stranger. One not retiring, but stepping down as Scholarship and Research Chairman is Richard Lombardi. Richard took over the chair 15 years ago when Bob Reynolds retired to a warmer climate. Richard has continued to work tirelessly to ensure that our S & R Tournament is one of the best hosted by a local association in the country. Even without an event this year, we are still able to award over \$20,000 in scholarships. This is possible because of the foresight and effort the Scholarship and Research committee had back in the mid 1990's. Thank you Richard for your hard work and efforts over the many years. And thank you to all of the S & R committee members.

I would also like to thank the RIGCSA Board of Directors for putting up with me, especially with these new zoom meetings we have all mastered. It was an extremely different year where we were challenged to change on the fly. You all stepped up and made this year as normal as it could have been.

Lastly, I need to thank Julie Heston for her hard work. Her patience. Her tolerance. And her perseverance. She has tolerated us all for almost 20 years, always with a smile, as far as I can tell over the phone. She keeps this association running smoothly and transitions to the next board without skipping a beat.

In January, we will have our annual meeting and it will be our second zoom meeting as an association. Again, Julie learned on the fly and has mastered the hosting duties. Hopefully you can zoom in. In December, incoming President John Lombardi put out a request looking for clubs to host "potential" meetings. We are hoping that operations at clubs will begin to resort back to pre-pandemic activity.

Gary Sykes also announced that the NERTCS will be virtual, along with Kevin Doyle announcing the same for the GIS. I encourage all to participate. There are many great topics being presented, and we all can't forget that we always need continuing education credits.

If I missed thanking someone, it was an oversight, I was once again under a deadline that Julie reminded me about on a Sunday night.

Here is to a brilliant 2021!

Respectfully,

**Mike Varkonyi**

## Kevin's GCSAA Corner By Kevin Doyle, GCSAA Northeast Field Rep.

With autumn passed by and the economic practices in the rearview mirror, the frosty and snowy mornings will begin, and staff numbers will have lightened. Planning projects may be part of a larger master plan for the facility. These are great tools to ensure the projects undertaken by the club are done in a fiscally responsible

manner and keep progress moving forward on a schedule. A very beneficial undertaking for the facility, but what impact does that have in your department? While budgeting offers a chance to plan for equipment and staffing numbers, have you done any planning specific to the grounds team at your facility? Below are some ways to maximize your team with currently available resources.

The winter offers the perfect time to engage your biggest assets, your team. Why not consider a SCOR analysis with them? Getting their feedback on team dynamics could be key in making improve-

ments you never saw. Where are the strengths of your team, what challenges do they see? Are there opportunities that would improve the processes you already have in place? What risks do your staff see within the grounds department? Would you benefit from this information? Would your team be more effective after engaging them in developing such an analysis?

Do you challenge or set goals for your staff? We thrive in an industry that blends science and art while newer techniques trend towards quantitative, measurable data. GCSAA offers two great programs that will benefit individuals on you staff, your team, and the facility. These professional development opportunities for key staff members can assist you structure advancement or benefit increases for your people, all while increasing their value to the facility. What better time to encourage participation than the off-season?

The **Assistant Superintendent Certificate Series** is composed of certificates covering key competency areas of:

- Agronomy
- Business
- Leadership and Communications
- Environmental Stewardship

The certificates are golf-centric, available to GCSAA members and non-members, and can be completed in any order. It is strongly recommended that an assistant superintendent has at least two years of work experience before beginning any of the ASCS certificates. However, the certificates are available to all and not limited to assistants.

**Equipment Management Certificate Program Level 1-Level 2**-Certification are a series of exams designed to demonstrate proficiency in key competency areas related to turf equipment. This certificate program is available to any and all turf equipment technicians regardless of whether you work for a golf course.

The Level 1 program is made up of eight exams covering the key competency areas of:

- cutting units
- drivetrain systems
- electrical systems
- engine technology
- hydraulic systems
- metalworking and fabrication
- spray systems
- fundamentals of turfgrass operations

You can choose to take one exam or work to complete the entire program by successfully completing all eight exams in any order. Level 2 follows completion, with a Certification opportunity upon finishing both levels.

You will spend countless hours with decision makers at your facility this winter preparing for improvements to the grounds to ensure a

# New for 2020

## Unique, Versatile, Cost-Efficient Surfactants for Superior Turf Quality

### TopSail™

TopSail™ is our unique blend of surfactant molecules for use on fairways and fine textured soils. Topsail can be used as a program product and/or a delivery agent for individual sprays (16oz/acre rate). Topsail addresses soil moisture problems on hillsides, mounds, and other difficult to access areas. It can be injected or sprayed.

- Greatly increases penetration of applied water and rainfall (3 times faster infiltration rate vs. the competition)
- Improves irrigation efficiency
- Enhances the efficacy and control of fertility & pesticide programs (reduces leaching)
- Can be sprayed or injected

Size: 2x2.5 gal cases, 30 gal drums, 55 gal drums, 275 gal totes

### Windjammer™

Windjammer™ is our blend of unique surfactant molecules that provide firm, dry, and fast surfaces and superior turf quality.

- Reduces wilt
- Superior plant moisture availability & turf quality
- 6 time faster infiltration rate vs. the competition
- Enhances the efficacy and control of fertility and pesticide programs

Size: 2x2.5 gal cases, 30 gal drums, 275 gal totes

## GRANULAR TURF FERTILIZERS

### SeaBlend® Plus with SynGen™

SeaBlend® with SynGen surfactant – two formulations: 12-0-12 and 12-4-5

- Improves nitrogen efficiency
- Improves soil wetting for better fertilizer efficacy and control
- Dramatically reduces potential for runoff, puddling, leaching and nitrogen loss due to volatilization
- Increases nitrogen retention and uptake
- Faster color response
- Better and sustained growth

SeaBlend® Plus with SynGen is also available in fairway grades (12-0-12 and 12-4-5).

Size: 50 lb bags

# RIGCSA Member News

The RIGCSA held their first virtual business meeting on December 15, 2020. We had 25 members in attendance.

*New England's Finest Sod*

PO Box 2 | 264 Exeter Rd  
 Slocum, RI 02877  
 (p) 800-341-6900 | (f) 401-295-0144  
[www.sodco.net](http://www.sodco.net)

*Spectacular Shortcut. Fantastic Fairway Height. Gorgeous Greens Height. Only at Sodco.*

Sodco is currently growing two varieties of **Fairway Height Bentgrass**. **Penway** bentgrass provides the broad genetic diversity that creates a fine texture and the dense, uniform turf. **PureFormance** bentgrass combines the three top performing bentgrass varieties to create optimal playing conditions.

Sodco's **Shortcut Bluegrass** is a mix of Kentucky Bluegrass varieties, maintained at a height of 5/8 inch.

Our shortcut bluegrass is grown with a blend of dwarf bluegrass that is able to handle the low height of cut, which makes this sod perfect for tee boxes and fairways. A perfect substitution for areas bentgrass is not preferred.

Sodco's **007/Declaration Greens Height Bentgrass** far exceeds the overall turf performance that is expected from a traditional bentgrass. This blend combines two top ranked varieties in overall turf quality and dollar spot resistance. Sodco's 50/50 blend is guaranteed to create optimal playing conditions for your greens.
